

IB958M

Access Control

Passive Cotag card with magnetic stripe

-
- No battery
 - Factory encoded

The IB958M is a factory-encoded ISO laminated passive card that does not include a battery. It is ideal for photo ID applications as it can be custom-printed on both sides. When it is used with a Cotag hands-free reader, the reading range is approximately 30 cm. With Cotag proximity readers, the reading range with the IB958M varies between 3 and 10 cm.

One of the major advantages of Cotag technology is that active and passive cards can be mixed in the same system to provide ultimate convenience and cost-efficiency.

Note: The card number is printed on the back of the card. This card also includes a magnetic stripe.

Quantity in order: 10

Technical data

IB958M

Dimensions (W x H x D)	54 x 86 x 0.76 mm
