SiPass®  
integrated

## Visitor management license

---

- **Access control functionality for visitors**
- **Quick and easy issuing of visitor badges**
- **Comprehensive reporting functions**

The modern office building is a complex affair. Personnel are often a mixture of permanent, contract and casual employees, each with different access requirements. If you add visitors, who can stay for periods ranging from a few hours to a few months, your cardholder management system can quickly become overloaded with information about both permanent and non-permanent cardholders. This might lead to confusion and inefficiencies in searching for records.

SiPass integrated addresses these problems with the visitor management option. With a unique user interface dedicated to capturing visitor details, visitor management graphically separates visitor information while offering exactly the same card encoding, access control and imaging features available to normal cardholders. It also includes an extensive reporting facility for visitor transactions and custom data pages that can be created exclusively for visitor records.

## Features

---

- Comprehensive reporting on all visitor activity
- Complete access control for visitors
- Visitor card status reports
- Up to 116 custom visitor fields can be created
- Visitor imaging and card printing
- Quick and easy re-issue of cards
- Familiar interface for visitor configuration
- Issue and return of cards prevents redundancy of cardholder records
- Easy recall of visitor information
- Full visitor tracking

## Description

---

The graphical user interface used to register visitors offers exactly the same options as for permanent cardholders. You can capture visitor images or paste existing image files, record personal details, print access cards and locate a visitor easily.

However, visiting cardholders from diverse backgrounds often require the gathering of more information. The extensive custom page functionality in SiPass integrated now covers visitors as well, allowing you to create up to 14 additional pages of custom data fields for visitors. This ensures that you can configure your cardholder management system exactly the way you want it, no matter who is being issued a card.

SiPass integrated promotes efficient cardholder management in the way visitor records are handled. Once a visitor has been registered, his or her card can be issued (activated) and returned (deactivated) as often as you like. This prevents multiple records being created for one visitor. Searching for visitor records is performed independently of normal cardholder records, keeping searches brief and easy.

All visitor transactions are clearly marked in the audit trail, and can be recalled using report templates dedicated solely to tracking visitor movements and card statuses.

## System Requirements

---

One of the following core software packages is required:

Type	Part no	Designation
ASL5000-SE	6FL7820-8AA10	SiPass integrated Standard
ASL5000-OA	6FL7820-8AA20	SiPass integrated Optima

## Details for ordering

---

To order the SiPass integrated software extensions, you must first complete a software license order form. Please contact your SiPass integrated supplier for further information.

Type	Part no	Designation
ASE5300-VM	6FL7820-8AE05	Visitor management license
