

SPC OnGuard Plugin

Overview:

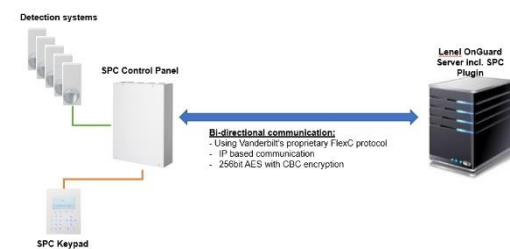

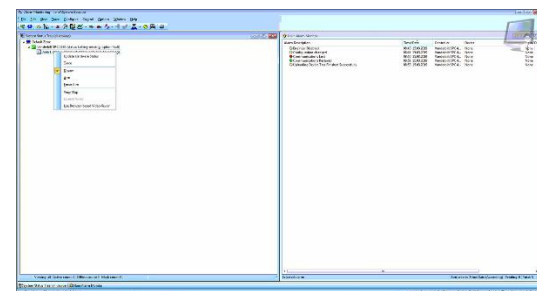

The SPC OnGuard plugin integrates with the OnGuard software to achieve an in-depth integration of the two systems.

The SPC OnGuard plugin allows users to trigger events such as alarms or status changes and to control SPC systems within the OnGuard system.

When installed, the plugin allows a 30-day trial for up to two panels and will allow the display of areas, zones, doors and outputs from the SPC system.

The plugin uses an IP-based, bi-directional and 256 bit AES with CBC encrypted FlexC® to communicate with the SPC control panel.

Vanderbilt is offering license package with a 5 SPC panel license. The license also provides customers with one year of support and updates.

Edition date: 10-12-2020

SPC OnGuard Plugin

Features & Benefits:

✓ Alarm Management

The operator will have the ability to control areas set and unsetting the system from within the OnGuard front end. The operator will also be able to control zones, outputs and doors on the SPC system. The system can be configured so that the graphical interface can be used to control all of these elements.

✓ Events Triggering (bi-directional)

The plugin will allow you to trigger events on the OnGuard system based on events from the SPC system. You will also be able to trigger actions on the SPC based on events the OnGuard system. Should the OnGuard system detect a fault it can now trigger the SPC to perform an action.

✓ Secure IP Communications

Using the SPC FlexC® communications protocol the installer uses a common setup to configure the communications and has the peace of mind that communicates are secure and reliable.

Key Features:

- Supports up to 5 SPC controllers
- Plug and play installation
- Alarm Management
- 256 bit AES with CBC encrypted communication
